

Tackling the challenge of safety excellence

**WORCESTER
WARRIORS**

Client vision:

As a Premiership Club and one of the top Rugby Union teams in the UK, Worcester Warriors also wanted to be at the leading edge of Health and Safety. The Club sought 4see's assistance in conducting an independent review of their current Health and Safety situation in order to identify key areas of improvement, and to set an example to other clubs.

How 4see helped:

Developing a strong safety culture starts at the top which is why we worked closely with the Club's Senior Managers from the get go.

Firstly, we completed a Strategic Compliance Audit which identified the key actions and priorities for the Club to tackle. We then led the Club management through the

process of training the key staff, and setting up the structures for ensuring engagement throughout the organisation. Once agreed with the senior team, 4see then implemented risk assessments, surveys and stadium inspections, ensuring that the Warriors have the most up to date standards and information.

Worcester Warriors are now empowered to run their day-to-day Health and Safety in partnership with 4see as we continue to provide support and advice.

With 4see's supportive role, we have made huge steps forward in the way we manage Health and Safety. This has benefited the Club massively and each department now includes Health and Safety in everything they do as a matter of course.

Helen Grayer, Facilities Manager, Worcester Warriors
